01 Brand Overview

What ScamSense represents, who it is for, and how people should feel when they use it.

ScamSense

Pause.
Check.
Verify.
Then Pay.

Spot the red flags in realistic, fictional scam scenarios, and practise the safest next step, so the real thing feels familiar.

ELEMENT	SCAMSENSE
Venture name	**ScamSense** Sense as in instinct: developing the instinct to recognise scams before you pay.
Brand description	An AI-powered scam-awareness game that trains people to spot suspicious payment requests, phishing messages and fake shopping scenarios through realistic, fictional challenges.
Target audience	**Primary:** 18–30-year-olds who use digital payments and shop or sell online. **Also:** universities, youth programmes and digital-safety educators. Open to every skill level, from Beginner to Advanced.
Brand personality	Reliable · Playful · Clear · Encouraging
Brand story / mission	To make scam awareness feel like practice, not panic, so anyone can pause, check and verify before they pay.

WHAT PEOPLE SHOULD FEEL

Capable
"I can spot this."

Calm
"No panic, just a plan."

Curious
"One more round?"

FOR EVERYONE, AT EVERY LEVEL

Beginner
Awareness: obvious warning signs

Intermediate
Recognition: less obvious tricks

Advanced
Critical thinking: mixed clues

Honest by design: ScamSense is an educational simulator. It does not detect fraud in real messages or access real accounts.

02 Logo System

A speech bubble and a nudge: listen to your instinct, then pay.
Two shapes, simple enough to work at 24 px.

ScamSense

A MAIN LOGO · FULL COLOUR (SYMBOL + NAME)

WHAT THE LOGO MEANS

The bubble is your inner voice: the gut feeling that says “wait”. Soft, rounded corners keep it friendly, never fearful. It also nods to the messages where most scams begin.

The yellow dot is the nudge: the one red flag your instinct picks up. It is the only place yellow appears in the symbol.

Sense

The name joins scam and sense: building the instinct to recognise scams. The symbol sits beside the name in the full logo and can stand alone as an app icon or game avatar.

B SYMBOL ONLY

ScamSense ScamSense

C BLACK & WHITE

ScamSense

D LIGHT BACKGROUNDS

ScamSense

E DARK BACKGROUNDS

ScamSense

F CLEAR-SPACE RULE

Keep a margin of **x** on every side of the logo, where **x** equals the width of the dot in the symbol. Nothing (text, images, edges) enters this zone.

G MINIMUM-SIZE RULE

24 px — ScamSense — 130 px

Symbol: 24 px on screen · 8 mm in print.
Full logo: 130 px wide on screen · 32 mm in print. Below that, use the symbol only.

NEVER

03 Color Palette

Just three colours. Deep teal builds trust, sunny yellow adds play and reward, white keeps it clean.

PRIMARY

Deep Teal

#0B5F66

RGB 11, 95, 102
CMYK 89 7 0 60

Use for: logo, headings, body text, main buttons, headers. Calm and dependable, and clearly different from PayPal's blue so it can never be mistaken for it.

SECONDARY

Sunny Yellow

#FFC93C

RGB 255, 201, 60
CMYK 0 21 76 0

Use for: rewards, XP, highlights, the logo's dot and "red flag" markers. Always with teal text on top.

BACKGROUND

White

#FFFFFF

RGB 255, 255, 255
CMYK 0 0 0 0

Use for: screens, pages and text on teal. Plenty of white space keeps the game feeling clear.

READABLE PAIRINGS (WCAG CONTRAST)

Aa Text	White on Teal	7.4 : 1 · AAA
Aa Text	Teal on Yellow	4.8 : 1 · AA
Aa Text	Teal on Mist	6.5 : 1 · AA
Aa Text	**Never** yellow text on white	1.5 : 1 · fails

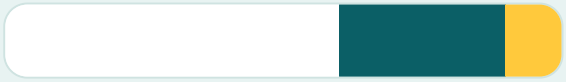

TINTS & SHADES, FOR DEPTH ONLY

Mist #E8F3F2 · Teal shade #073F44 · Yellow tint #FFF3D1 · Yellow shade #D9A21B

Tints and shades of the same three colours, used for card backgrounds and 3D button edges. No fourth hue is ever added.

PROPORTION ON A TYPICAL SCREEN

White 60% · Teal 30% · Yellow 10%

Yellow is a spark, not a flood. It marks the one thing worth noticing on a screen, just like the dot in the logo.

FEEDBACK WITHOUT RED OR GREEN

✓ **Nice catch!** Correct answers use teal, a tick and warm words.

⚑ **Look again.** Misses use a yellow tint and a flag, so nobody feels scolded.

Scam training should teach calm decisions, so we avoid alarm-red. Meaning is always carried by an icon and words too, never by colour alone.

COLOUR RULES

1. One yellow highlight per screen, so the eye knows where to look.
2. Yellow always carries teal text, never white.
3. No extra hues, gradients or red/green status colours.

04 Typography System

Rounded Nunito for the friendly voice, neutral Inter for clear reading. Both free and open-source OFL.

USE	FONT	STYLE & SIZE (SCREEN)
Heading	Nunito ExtraBold	Large titles · 32/38 px · tight tracking 1%
Subheading	Nunito Bold	Section titles · 22/28 px
Body	Inter Regular	Main reading text · 16/24 px · never below 14 px
Caption	Inter Medium	Small labels, hints · 13/18 px
Button / label	**NUNITO BLACK**	Actions and navigation · 15 px · UPPERCASE · 5% tracking

Fallbacks: Nunito → Quicksand → system-ui · Inter → system-ui. Future Arabic content: pair with a rounded Arabic face such as Noto Kufi Arabic or Cairo, at the same sizes.

05 Visual Style System

Chunky, rounded and encouraging: serious about safety, light in how it feels.

1 ICON STYLE

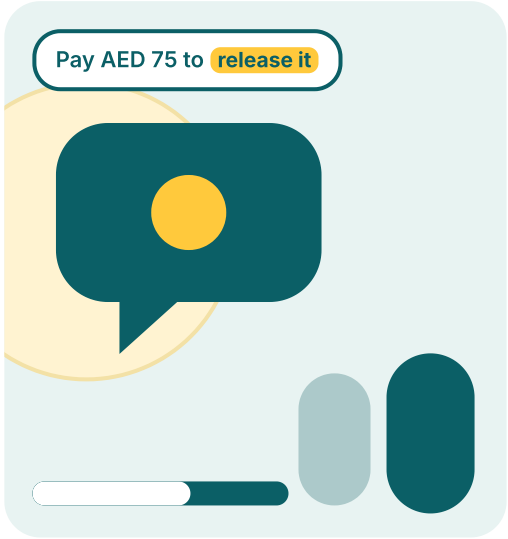

GAME ICONS

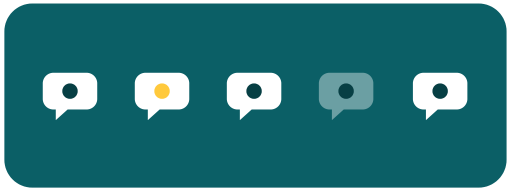

Rule: 2 px rounded teal outline, one yellow fill, 24 px grid, always inside a rounded tile.

Why: one glance tells a first-time player which scam type they are facing, and the soft shapes keep a serious topic friendly.

2 SHAPES & GRAPHIC ELEMENTS

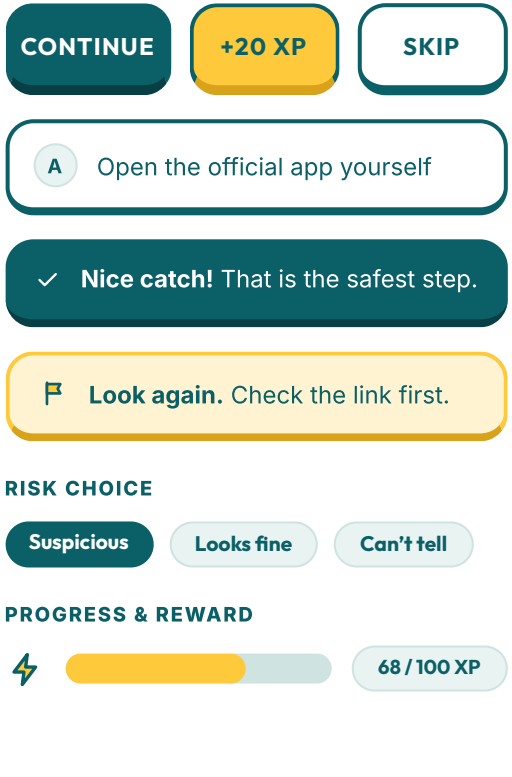

NUDGE PATTERN

Rule: only circles, pill bars and speech-bubble shapes, with corners of at least 12 px. Use one yellow shape per layout.

Why: every shape comes from the logo, so a layout feels like ScamSense even without the logo on it.

3 BUTTON & CARD STYLE (DIGITAL PRODUCT)

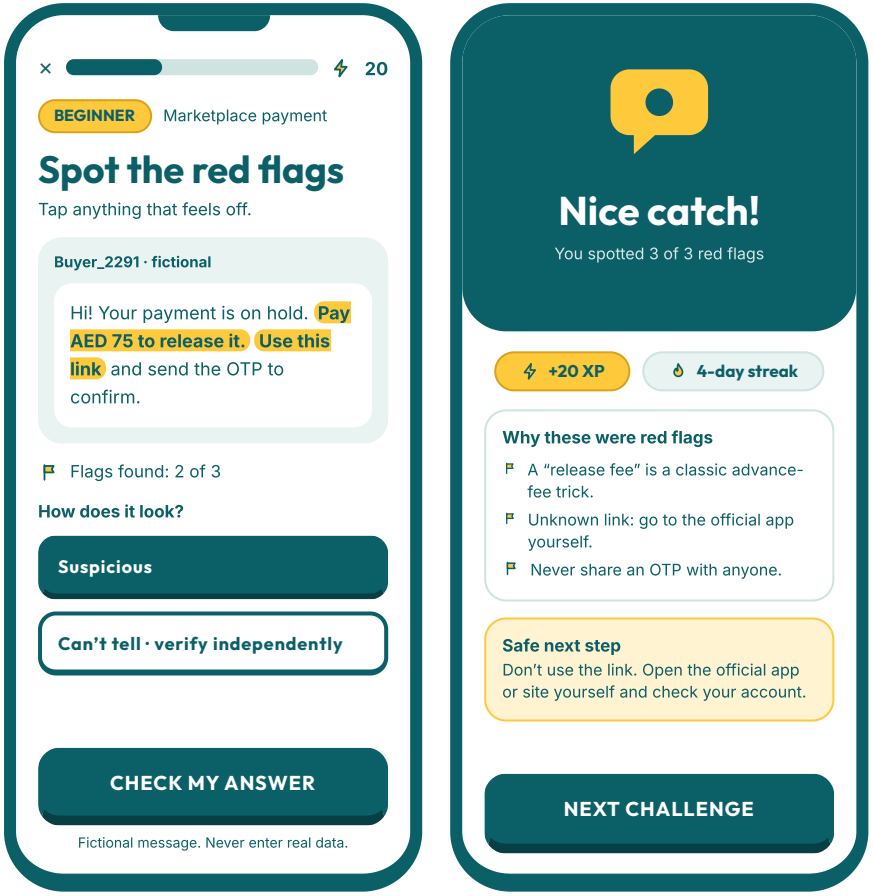

Rule: 12–16 px radius, 2 px teal border, thicker bottom edge for a pressable feel. One main button per screen. Praise first, explanation second.

Why: the pressable 3D feel is playful and obvious for first-time users, while restrained colours keep it professional.

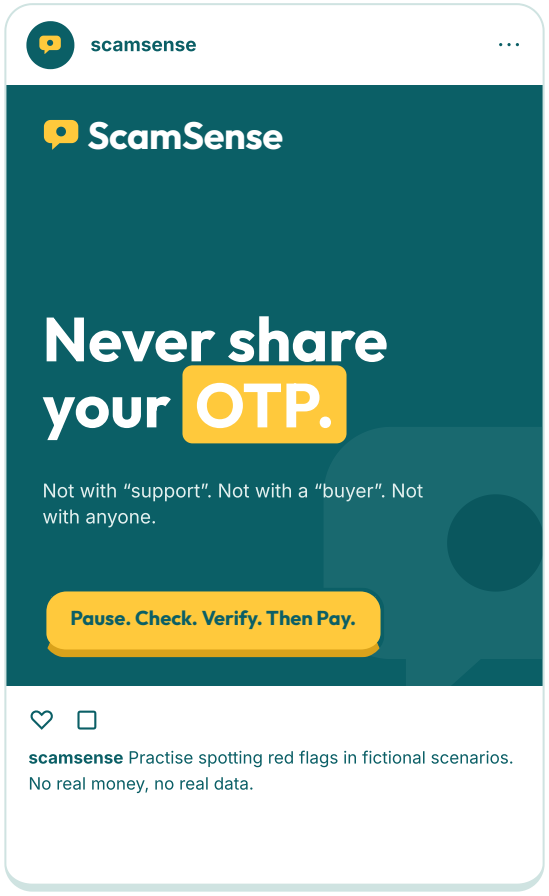

06 Brand Applications & Mock-ups

The same logo, colours, type and shapes across an app, a social post and a campus poster. All scenarios are fictional.

A APP SCREENS · INSPECT & FEEDBACK

B INSTAGRAM POST

C CAMPUS EVENT POSTER

QR code is a placeholder in this mock-up.

Logo. Reverse version on teal, full colour on white, clear space respected.

Colour. Teal, yellow and white only, in roughly 30 / 10 / 60 proportion.

Aa **Type.** Nunito for headlines and buttons, Inter for reading text.

Style. Rounded shapes, yellow flags, chunky buttons and one clear message.
